

I2C_Exported_Functions

Peripheral State, Mode
and Error functions

```
graph RL; A[Peripheral State, Mode and Error functions] --> B[I2C_Exported_Functions];
```

The diagram consists of two rectangular boxes connected by a horizontal arrow pointing from right to left. The box on the right is shaded gray and contains the text 'Peripheral State, Mode and Error functions'. The box on the left is white with a black border and contains the text 'I2C_Exported_Functions'. The arrow indicates that the peripheral state and error functions are inputs or dependencies for the exported functions.
